

Genesis Poly Recycling Inc., Mankato, MN is the premier, one stop solution for recycling rigid and film plastic materials for the industrial, post consumer, agricultural, horticultural, food and packaging industries in the Midwest. We strive for superior customer service in reclaiming previously “unrecyclable” materials and closing the loop from formerly land filled or burned waste into new manufactured products.

Spring 2010 Acceptance Guidelines for Mini-bulks and Poly Drums

Empty pesticide containers, whether large or small, need special attention when it comes to recycling. You must follow these guidelines:

- 1) Make sure each container is triple-rinsed and/or power rinsed several times. No residues can be present on the container. Dirty containers will not be accepted!!
- 2) Containers must be free of all metal and wood at the time of acceptance. A \$10 per container charge will be assessed for containers with metal or wood on them. Labels can be left on.
- 3) Containers can be "nested" by removing the top of one larger container with a saw and then placing sections of three to four other containers on the inside of the first one.
- 4) If self-transporting to Mankato, a bill of lading will need to accompany the load.
- 5) If you need help transporting your minibulks and/or polydrums or want Genesis to provide trucking assistance please contact Wess Damro at (507) 344-2180.

We want to be YOUR RECYCLER in 2010 and look forward to serving you with this initial mini-bulk service program and then adding our on-site, mobile shredding services later this summer for 2 1/2 gallon containers and new mini-bulks and poly drums. Should you have questions or need directions to our plant, do not hesitate to contact Wess Damro at 507-344-2180.
